

"The 7th edition of the NAON *Core Curriculum for Orthopaedic Nursing* serves as an indispensable reference for new and seasoned orthopaedic nurses alike. It provides up-to-date, cutting edge orthopaedic nursing care, including clinical presentations, diagnostic testing, and nursing plans of care. With an easy-to-read format, the NAON *Core Curriculum* provides an in-depth look at the nursing care for orthopaedic injuries and illnesses throughout the lifespan. It is an essential study tool for nurses to prepare – and pass – the NAON certification examination. This text is a must for any orthopaedic nurse's library."

Peggy Herzberg, MS, RN, ANP, ONC

*Director of Medical Services, The Helen Keller National Center, Sands Point, NY
Editor, 2012 NAON Orthopaedic Nursing Review Course*

"The NAON *Core Curriculum for Orthopaedic Nursing* proves to be indispensable, as the definitive source of clinical information in orthopaedic nursing practice. For both experienced orthopaedic nurses, as well as those who are new to the specialty, the latest edition of the *Core Curriculum* provides up-to-date answers to the practical challenges encountered in the care of our patients. Once again, NAON shines as the premier authority on the art and science of our specialty – orthopaedic nursing."

Mickey Haryanto, RN-BC, ONC, MBA

*Orthopaedic Service Line Program Manager, Berkshire Medical Center, Pittsfield, MA
Chair, 2012 NAON Education Committee*

"This updated resource covers the entire spectrum of orthopaedic nursing care. Each chapter's objectives and discussions fully describes the conditions and care implications towards positive patient outcomes. There are images and tables to help synthesize the information. The comprehensive appendix references the related NANDA Nursing Diagnosis related to each orthopaedic condition and lists the associated Nursing Interventions Classifications (NIC) and Nursing Outcome Classifications (NOC). This will serve as an easy-to-follow reference when identifying and differentiating orthopaedic patient needs, expected nursing care, and expected outcomes.

Carol V. Harvey, MSN, RN, ACNS-BC, ONC

*Professor of Nursing/Orthopaedic CNS, Cypress College Department of Registered Nursing, Cypress, CA
Editor, 2013 NAON Scope and Standards of Orthopaedic Nursing Practice*
